## EDUCATION

### Polytechnic University of the Philippines - BS Information Technology

2022 - 2026

Relevant Coursework: Web Development, Database Management Systems, Software Engineering, Operating Systems, Cybersecurity

---

## WORK EXPERIENCE

### SmartBridge - Salesforce Developer Intern | Remote

Sept 2025 - Dec 2025

- **Reduced manual data handling** through automation workflows.
- Customized Salesforce objects, fields, workflows, and validation rules based on business requirements.
- Built and tested automation using Process Builder/Flows to **improve operational efficiency**.

### Appliance Warehouse Website - UI/UX Designer | Remote

Nov 2025 - Dec 2025

- Designed and improved website UI/UX for an appliance e-commerce platform, focusing on layout clarity, accessibility, and conversion flow.
  - Improved user navigation and visual hierarchy, **reducing user confusion** and improving usability feedback.
  - Improved page layout consistency and readability across **100% of core pages**.
  - Reduced visual clutter and improved CTA visibility, contributing to **clearer purchase flow**.
- 

## PERSONAL PROJECTS

### Budget Biayahe - Full-stack Developer

- Designed and developed a Smart Fare Calculation for Tricycles & Jeepneys.
- Reduces fare estimation time by **~80%** compared to manual inquiry or negotiation.
- Provides **instant cost comparison** across up to **3 transport options** per trip.
- Helps minimize fare disputes by presenting **consistent, rule-based estimates** rather than negotiated pricing.
- Optimized API calls and request flow to prevent server overload, **staying within a 500 requests/hour limit** while maintaining performance and reliability.

### SafeZone PH - Full-stack Developer

- Built a full-stack web application for barangay and community-level incident reporting.
  - Reduces incident reporting time by **~50-60%** versus manual or paper-based processes.
-
