WORK EXPERIENCE:

Elevora Technologies | *Junior Software Developer* | 2026

- Built full-stack SaaS features using Next.js, tRPC, and Prisma.
- Utilized modern AI-assisted development tools such as Claude Code CLI and DevSwarm to improve development efficiency.
- Debugged issues, optimized performance, and ensured applications were stable and production-ready.
- Successfully completed and shipped multiple SaaS projects for internal and client use.
- Handled background jobs, event-driven workflows, and asynchronous processes using Inngest.
- Deployed and maintained production applications using Vercel.

SmartBridge | *Salesforce Developer Intern (Remote)* | 2025

- Built record-triggered and screen-based Salesforce Flows to automate lead intake, record updates, and approval steps, reducing manual CRM operations and human error.
- Designed and implemented custom objects, fields, relationships, and validation rules, improving data accuracy and consistency across Sales, Service, and internal workflows.
- Applied role-based access, profiles, and permission sets to enforce data security and proper user access control.
- Performed data modeling and schema optimization to support scalable CRM usage and long-term maintainability.

Appliance Warehouse | *UI/UX Designer (Freelance)* | [Project Link](#) | 2025

- Executed a full end-to-end website flow redesign, restructuring navigation, page hierarchy, and user journeys to significantly improve overall user-friendliness and task completion flow.
- Reworked information architecture to reduce friction across browsing, product discovery, and checkout stages.
- Optimized CTA placement, spacing, and visual hierarchy, improving clarity and guiding users more effectively toward conversion actions.
- Built a scalable design system (typography, layout rules, reusable components) to maintain visual consistency and speed up future updates.

RELEVANT PROJECTS:

Budget Byahe | *Full-stack Developer* | *Capstone Project* | [Project Link](#)

- Engineered a mapping system that leverages AI to determine the most cost-efficient transport combinations for tricycle and jeepney commuters, optimizing route discovery through natural language processing.
- Developed a fare calculation engine based on LTFRB and LGU fare matrices, enabling accurate fare estimates and helping reduce commuter overcharging.
- Integrated an AI-powered chatbot to deliver instant, conversational answers to local commuting questions.
- Deployed a full-stack solution capable of handling real-time user queries and dynamic route computation.

Tech: React, Laravel, Firebase, MySQL, Google Cloud Platform, Groq AI

EDUCATION:

Bachelor of Science in Information Technology

Polytechnic University of the Philippines – Santa Maria, Bulacan | 2022 – 2026

Relevant Coursework: Web Development, Database Management Systems, Software Engineering, Operating Systems, Cybersecurity, UI/UX Design

ACHIEVEMENTS & CERTIFICATIONS:

- Top 15 / 74 Teams — Philippine Startup Challenge (PSC) 10
- AWS Cloud Practitioner — Udemy
- Introduction to Cybersecurity — Cisco
- Master AI for Web Apps — Simplilearn
- Frontend Development Libraries — freeCodeCamp

SKILLS:

Core Development

- **Languages:** JavaScript (ES6+), TypeScript, PHP, SQL (PostgreSQL, MySQL), HTML5, CSS3, C#
- **Frontend:** Next.js, React, Tailwind CSS, Framer Motion
- **Backend & Database:** tRPC, Inngest (Event-Driven Workflows), Laravel, Prisma ORM, PostgreSQL, MySQL

AI & Modern Engineering

- **AI & LLMs:** OpenAI API, Anthropic Claude, Groq AI, Prompt Engineering, AI Agent Integration
- **Tools & Environment:** Devswarm, Git/GitHub, Cursor, VS Code, Figma (UI/UX Design)
- **Cloud & Deployment:** Vercel, Microsoft Azure, Google Cloud Platform (GCP)
